

REVMAX

Performance Valve Bodies

Why RevMax Valve Bodies?

RevMax valve bodies feature Sonnax performance and durability upgrades to give you the highest quality and most reliable valve body assemblies. Alongside these items, RevMax has also designed its own line of proprietary upgraded parts.

VBT

Zoom Technologies VBT4000 fully computerized valve body dyno with heated fluid has the ability to test each unit with up to 300PSI and temperatures of up to 150 degrees.

Solx Computerized Solenoid Tester

Solenoids are flushed, cleaned and finally tested individually to insure that they perform flawlessly. Solenoids are tested with heated fluid and graphically analyzed by our computer controlled Solx solenoid tester. Updated precision alloy bushings are installed in all Aisan Warner valve bodies with linear solenoids to keep them clean and functional for life!

Vacuum Testing

After being thoroughly cleaned the units are inspected and then leak down tested via our state of the art vacuum leak down tester. We adhere to the well established and recognized Sonnax industry standards for bore and valve leakage and wear.

Cleaning Area

Each core is fully disassembled and then cleaned in either mineral spirits or in most cases in our ultrasonic valve body cleaning machine.

Valve Bodies In Stock

We have a huge inventory of valve body cores on hand. We strive to keep most late model units in stock, and in the event we do not have the unit you need, we offer guaranteed 48 hour turnaround service!

Each RevMax valve body offers a 1 year unlimited mileage warranty!

Some units do not include solenoids. Units do not come with TCM or Mechatronic units as they are vehicle specific.
